

# CCDC Inject

<b>INJECT NAME</b>	Implement an IPv6 Network between Two Servers
<b>INJECT ID</b>	DSGN04T

**INJECT DESCRIPTION:**

Implement a IPv6 network, dual stacked with the existing IPv4 network, between two devices, using private IPv6 addressing.

**INJECT DELIVERABLE**

Respond with a business memo that documents the addressing scheme used. Show the interface configuration of each server via a clearly readable screenshot. Include a screen shot of an IPv6 ping from each server to the other peer.
