

CCDC Inject

INJECT NAME	Capture and Assemble Web Traffic
INJECT ID	EVAL08A

INJECT DESCRIPTION:

Use a packet capture tool to capture a complete legitimate web server transaction. Assemble and filter as needed so that only the packets involved in this transaction are displayed. Be sure to show the 3-way handshake at the start and the FIN flagged packets at the end.

INJECT DELIVERABLE

Respond with a business memo that documents the tool used. Use screenshot to display the assembled packet flows. Be sure the shots are clear to read and that the beginning and end packets are discernible.
